Shared recurrence with additional natural-text exposure
One paired seed: 23
Positive favors shared recurrence
DEV weighted NLL (nats / real token)
Real source targets (billions)
Ordinary
Shared two-pass
Ordinary NLL − shared NLL
3B endpoint gain: +0.00011
Stable checkpoints
Declared useful gain: 0.01
Diamonds: separately annealed 1B branch. Stars: annealed 3B endpoint. No seed interval from this one pair.
